

MPK Tool-Management-System

**Groundbreaking.  
Efficient.  
Innovative.**

# MPK Tool Dispenser – A simple, safe and reliable tool supply system.

## Perfect availability, easy management

Product issuing from your tool store is unnecessary! The MPK Tool Dispenser always guarantees accurate tool supply on demand without elaborate orders. All relevant product usage information can be accessed and analyzed at any time via consumption and booking journals data stored from historical usage.

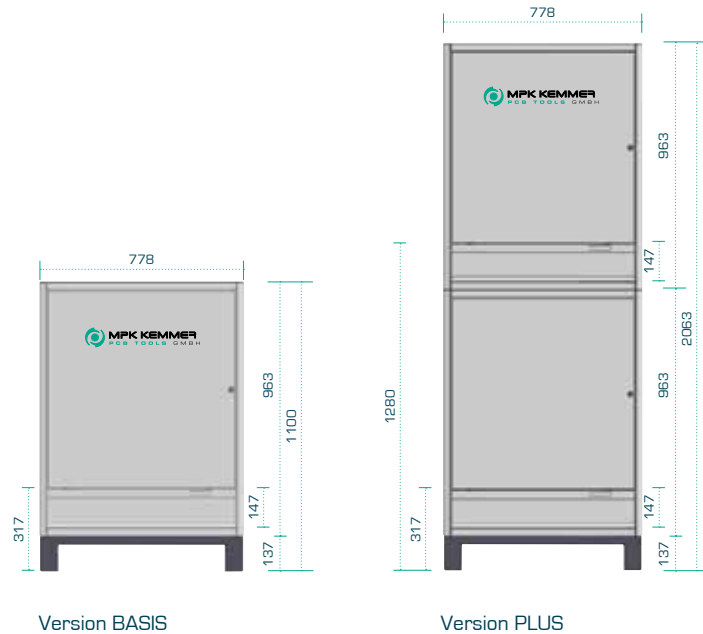

The MPK Tool Dispenser is available as "BASIS version" and as "PLUS version" which has a significantly increased storage capacity. Both versions are individually configurable and user-friendly. You can use pusher, spirals or double-spirals – this combination is unique in the PCB-industry. The MPK Tool Dispenser is characterized by its innovative modern design, with touch screen and pleasing appearance.

Years of experience with our previous Dispenser and Tool Management-Software has led to this new Dispenser design precisely matched to the needs of the market.

**Made in Germany.**

## Facts

- Individually configurable with pushers or spirals
- Also available in double-spiral design
- Clear displays and user-friendly
- Low space-requirements
- Two units can be assembled together as version PLUS
- Modular extendable

Model	BASIS	BASIS Doublespiral	PLUS
Capacity	40 different items Spiral: 8.000 tools Pusher: 14.000 tools	80 different items Spiral: 8.800 tools	Up to 160 different items or 28.000 tools
Access to item	Automatic release of required quantity in drawer		
Data entry	Touchscreen, mouse, keyboard, barcode scanner		
Software	MPK Kemmer GmbH PCB Tools "Tool Management Software"		
System languages	German / English / French		
Special features	extendible up to 16 units		
Dimensions	110 cm x 78 cm x 96 cm	110 cm x 78 cm x 96 cm	206 cm x 78 cm x 96 cm
Weight	approx. 220 kg [unloaded]		approx. 400 kg [unloaded]

# Benefits

No missing tools

No tied capital

Simple handling

Withdrawal according to FIFO-principle

Security of supply

Elimination of non - recorded stock

100 % control of consumption

Permanent stock control

Cost reduction for storage, scheduling and purchasing

# MPK Tool Management Software – User-friendly, clearly designed and all relevant information quickly available.

## MPK Tool Management Software

Our new MPK Tool Management Software offers you the opportunity to manage your tool storage in the simplest way for new or re-sharpened tools. It simplifies the entire purchasing and administrative process. The monitoring of the inventories is carried out online by MPK Kemmer GmbH PCB Tools and subsequent deliveries are initiated automatically.

The MPK Tool management software combined with our new tool MPK dispensers are the most modern and innovative system of tool management in the PCB industry.

## Benefits of the MPK Tool Management Software:

- Permanent stock overview
- Management of new and re-sharpened tools
- Simple handling
- Easy to use with an intuitive design
- Clear and transparent
- Division into tool classes and diameter ranges possible
- Graphic storage location management
- Easy output of inventory and consumption data
- Registration via user password possible
